

# GENEE **VISION** MICRO

This innovative microscope is a fantastic tool that can be used in all the scientific departments and divisions throughout your organisation. Providing the full functionality of a standard microscope but with a digital camera attached, allowing the whole class to view live detail as well as offering the ability to save and capture images of the slides to a PC or server. This opens up huge possibilities for discussions as captured images can be used in future lessons/lectures and can be opened on an interactive whiteboard enabling full integration with other software and annotation.

## Features/Benefits

- Powerful magnification with 12x optical and 8x digital zoom for viewing any object in great detail
- Plug and play digital camera provides excellent image quality
- Smart auto focus button achieves the ideal visual effect with the touch of a button
- Can be connected to any PC, Laptop, Interactive Whiteboard or projection device to allow everyone in the class or lecture to view the slides together and on a much larger scale
- Built-in back light for negative and slide viewing
- Offers the presenter maximum interaction with the audience as they are not required to remain at the front of the room to conduct the presentation
- USB2.0 port offers fast and unlimited computer image, save/recall/edit
- Comes complete with carry case and software
